

Federico Ordonselli

Junior Frontend Developer

Rome, Italy · +39 348 2143491 · fede.ordons@gmail.com · linkedin.com/in/federico-ordonselli-aa7363226
ordonselli.info · github.com/Federico-Ordonselli · gitlab.com/Federico-Ordonselli

PROFILE

Junior developer focused on frontend work with React and TypeScript, comfortable across the full stack. I build complete, carefully finished applications with automated tests, CI/CD pipelines and attention to accessibility and responsive design. My background in airport security operations and cybersecurity (CompTIA Security+ and CySA+) left me with method, procedural rigour and composure under pressure.

PROJECTS

Matchday · React · TypeScript · Express · PostgreSQL · CI/CD gitlab.com/Federico-Ordonselli/matchday

- Simulated sports betting platform built on live football data: pnpm monorepo with a React app, a typed Express API and an Angular back-office.
- React 19 frontend with routing, CSS Modules and design tokens, mobile-first layout and explicit loading, error and empty states; accessibility verified through role-based queries.
- 162 automated tests with Vitest and React Testing Library; custom fetch hook with AbortController and a stale-response guard.
- GitLab CI pipeline (lint, type check, test, build, SAST and Secret Detection) and a strict Gitflow workflow with protected branches, merge requests and tagged releases.

Runebog GM · Next.js 15 · TypeScript · Postgres · Tauri runebog.app

- Campaign management app for tabletop role-playing games, migrated from vanilla JavaScript to Next.js 15 and deployed on Vercel.
- Hierarchical SVG bubble map with pan and zoom, D&D 5e bestiary, quest journal, keyboard shortcuts and a procedural dungeon generator.
- Cloud sync with Google OAuth and a single-state JSONB architecture; also shipped as a Tauri desktop app.

Learning Vault · Next.js · React · Tailwind · Drizzle · Docker

- Self-hosted app that turns videos and documents into study material: React and Tailwind v4 interface, yt-dlp and Whisper ingestion pipeline, local language models through Ollama, SQLite persistence with Drizzle, fully containerised with Docker.

ordonselli.info · React · Vite · Vercel ordonselli.info

- Personal portfolio site, designed and maintained independently, collecting my projects and their public repositories.

TECHNICAL SKILLS

Frontend	React 19, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, CSS Modules, Tailwind, responsive design, accessibility (WCAG basics)
Backend	Node.js, Express, FastAPI, API REST, PostgreSQL, SQLite, Drizzle ORM, zod
Testing	Vitest, React Testing Library, Jest, unit and integration testing
Versioning	Git, Gitflow, GitLab (merge requests, CI/CD), GitHub, NPM/pnpm
DevOps	Docker, Docker Compose, GitLab CI, GitHub Actions, Terraform, Azure, Linux
Other	Python, SQL, data analysis (Pandas, Power BI), RAG and local LLMs (Ollama)

CERTIFICATIONS AND LANGUAGES

- | | |
|--|-------------------|
| • CompTIA CySA+ (CS0-003) — January 2026 | • Italian: native |
| • CompTIA Security+ (SY0-701) — October 2025 | • English: C1 |
| • IBM Data Analyst Professional Certificate (Coursera) — August 2025 | |
| • Meta Front-End Developer Professional Certificate (Coursera) — in progress | |

EXPERIENCE

Airport Security Officer · ICTS — Fiumicino Airport, Rome 2023 – 2025

- Monitored security systems in a high-stakes operational environment under standardised procedures and tight reaction times; handled critical incidents, alerts and reporting in coordination with the team.

EDUCATION

Scientific High School Diploma, Applied Sciences track · Liceo

Scientifico A. Labriola, Rome

- Track with Computer Science as a core subject in place of Latin: programming fundamentals and algorithms.
